MASTER'S THESIS

Deep Reinforcement Learning: Reliability and Multi-Agent Environments [Thesis, Slides]

My goal was to make self-driving cars a reality in my country, India. I modeled this as a safety-critical multi-agent learning problem and:

- proposed a risk-averse imitation learning algorithm that achieved lower tail-end risk compared to the then state-of-the-art,
- trialled a curriculum-based learning approach for multi-agent learning in RoboSoccer, and
- extended the TORCS racing game to release the first open-source driving simulator that supports multi-agent training – MADRaS (has 100+ stars on Github).

WORK EXPERIENCE

- Software, Automation, and Testing Team Member, **AlbertaSat** *April 2023–ongoing*
  Edmonton, Canada
  AlbertaSat is University of Alberta's student group that designs, builds, and operates nano satellites. I write software and simulate various operational and safety scenarios of our upcoming satellite to ensure it can robustly achieve all the mission objectives.
- Research Intern, **Google Research, Brain Team** *June–Sep 2022*
  Toronto, Canada Advisors: Bo Chang, Alexandros Karatzoglou
  Investigated methods for action-space generalization in reinforcement learning for large-scale recommender systems like YouTube.
- Research Intern, **Huawei Research** *May–Aug 2019*
  Edmonton, Canada Advisor: Hengshuai Yao
  Began investigating the discounted-reward and average-reward formulations for continuing (non-episodic) problems in reinforcement learning.
- Research Intern, **Intel Labs** *May–Jul 2017*
  Bengaluru, India Advisor: Bharat Kaul
  Started work on a risk-averse imitation learning approach that achieved up to 89% improvement over the then state-of-the-art on standard robotic control tasks.
- Research Intern, **Purdue University**, Dept. of Computer Science *May–Jul 2016*
  Indiana, USA Advisor: Bruno Ribeiro
  Analyzed the expected activity-lifespan of social-media users based on their early profile activity. Curated and released a rich social-media dataset for public use via a technical paper.
- Software Engg. Intern, **Amazon Development Center** *May–Jul 2015*
  Chennai, India Advisor: Sravan Bodapati
  Helped build a classifier to determine the start-reading-location of books.
  Now in production, this feature helps Kindle users start reading a book quicker after downloading it without having to flip through pages like acknowledgements or copyright notices.
