MASTER'S THESIS

Deep Reinforcement Learning: Reliability and Multi-Agent Environments [Thesis, Slides]

My goal was to make self-driving cars a reality in my country, India. Towards this end, I modeled it as a multi-agent learning problem in a safety-critical application and:

- proposed a risk-averse imitation learning algorithm that achieved lower tail-end risk compared to the then state-of-the-art,
- trialled a curriculum-based learning approach for multi-agent learning in RoboSoccer, and
- extended the TORCS simulator to release the first open-source driving simulator that supports multi-agent training MADRaS (has 100+ stars on <u>Github</u>).

WORK EXPERIENCE

- Research Intern, Huawei Research
 Edmonton, Canada
 Started investigating the discounted and average-reward formulations for continuing (non-episodic) problems in RL.
- Research Intern, **Intel Labs****Bengaluru, India*

 Started work on a risk-averse imitation learning approach that achieved up to 89% improvement over the then state-of-the-art on standard robotic control tasks.
- Research Intern, Purdue University, Dept. of Computer Science
 Indiana, USA
 Advisor: Bruno Ribeiro
 Analyzed the expected activity-lifespan of social-media users based on their early profile activity.
 Curated and released a rich social-media dataset for public use via a technical paper.
- Software Engg. Intern, Amazon Development Center
 Bengaluru, India
 Built a classifier to determine the start-reading-location of books.

 Now in production, this feature helps Kindle users start reading a book quicker after downloading it, without having to flip through pages like acknowledgements or copyright notices.

TEACHING EXPERIENCE

- Teaching Assistant, Reinforcement Learning II (CMPUT609)
 University of Alberta, Edmonton, Canada
 Instructor: Richard S. Sutton
- Teaching Assistant, **Reinforcement Learning I** (CMPUT397)

 University of Alberta, Edmonton, Canada

 Instructor: Martha White
- Teaching Assistant, **Reinforcement Learning II** (CMPUT609)

 University of Alberta, Edmonton, Canada

 Instructor: Richard S. Sutton
- Content Developer, <u>Coursera Reinforcement Learning Specialization</u>

 Jan Oct 2019

 University of Alberta, Edmonton, Canada

 Instructors: Adam White, Martha White
- (Head) Teaching Assistant, **Reinforcement Learning** (CS6700) *Jan May 2018* Indian Institute of Technology Madras, Chennai, India Instructor: B. Ravindran
- Teaching Assistant, **Machine Learning** (CS4011) Aug Nov 2017 Indian Institute of Technology Madras, Chennai, India Instructors: B. Ravindran, M. Khapra

RELEVANT AWARDS

Best Poster Award runner-up at AICan 2019 poster competition at NeurIPS 2019
 University of Alberta Graduate Fellowship for excellent academic performance 2019
 Star TA Award for outstanding work as a Teaching Assistant 2018
