MASTER'S THESIS

Deep Reinforcement Learning: Reliability and Multi-Agent Environments [Thesis, Slides]

My goal was to make self-driving cars a reality in my country, India. Towards this end, I modeled it as a multi-agent learning problem in a safety-critical application and:

- proposed a risk-averse imitation learning algorithm that achieved lower tail-end risk compared to the then state-of-the-art,
- trialled a curriculum-based learning approach for multi-agent learning in RoboSoccer, and
- extended the TORCS racing game to release the first open-source driving simulator that supports multi-agent training MADRaS (has 100+ stars on <u>Github</u>).

WORK EXPERIENCE

- Software, Automation, and Testing Team Member, AlbertaSat
 Edmonton, Canada
 AlbertaSat is University of Alberta's student group that designs, builds, and operates nano satellites. My role is to simulate various operational and safety scenarios of our upcoming satellite to ensure it can robustly achieve all the mission objectives.
- Research Intern, **Huawei Research**Edmonton, Canada

 Began investigating the discounted-reward and average-reward formulations for continuing (non-episodic) problems in RL.
- Research Intern, **Intel Labs****Bengaluru, India*

 Started work on a risk-averse imitation learning approach that achieved up to 89% improvement over the then state-of-the-art on standard robotic control tasks.
- Research Intern, Purdue University, Dept. of Computer Science
 Indiana, USA
 Analyzed the expected activity-lifespan of social-media users based on their early profile activity.
 Curated and released a rich social-media dataset for public use via a technical paper.
- Software Engg. Intern, **Amazon Development Center**Chennai, India

 Helped build a classifier to determine the start-reading-location of books.

 Now in production, this feature helps Kindle users start reading a book quicker after downloading it, without having to flip through pages like acknowledgements or copyright notices.

TEACHING EXPERIENCE

• Teaching Assistant, **Reinforcement Learning II** (CMPUT609)

University of Alberta, Edmonton, Canada

Jan-Apr 2020, 2021, 2023

Instructor: Richard S. Sutton

• Teaching Assistant, **Reinforcement Learning I** (CMPUT397)

University of Alberta, Edmonton, Canada

Instructor: Martha White

• Content Developer, <u>Coursera Reinforcement Learning Specialization</u>

University of Alberta, Edmonton, Canada

Instructors: Adam White, Martha White

• Teaching Assistant, **Machine Learning** (CS4011) Aug-Nov 2017 Indian Institute of Technology Madras, Chennai, India Instructors: B. Ravindran, M. Khapra
